Introduction

Overview

MEC-LAN-M002 is an Ethernet card for embedded PC. The card follows the Mini PCI-e standard which is compliant with PCI Express x 1 classification and small form factor (30x50.95 mm). This board fits in any host computer that has mini express card slots. MEC- LAN-M002 is a highly cost-effective solution to expand Gigabyte network for your computer.

Features

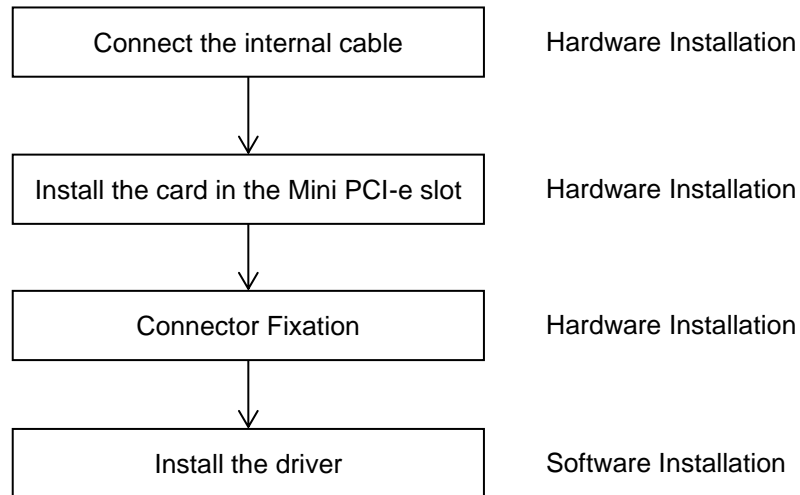

The PCI Express boards have the following outstanding features:

- PCI Express x 1 compliant
- Integrated 10/100/1000Mbps transceiver
- IEEE 802.3, IEEE 802.3u, IEEE 802.3ab, and IEEE 802.3z compliant
- IEEE 802.3x Full-Duplex flow control

Installation Flowchart

Installation Flowchart of MEC-LAN-M002

The following flowchart provides a brief summary of the procedure you should follow to install the Mini PCI-e card:

Package Checklist

The following items are included in the Mini PCI Express board Package:

- Mini PCI-e Card x 1
- Daughter Board x 1
- Bracket x 1
- M2.5 Screw x 2
- 20Pin Internal Connection Cable (30cm) x 2
- Quick Installation Guide (Printed) x 1
- Driver CD x 1

Note: Notify your sales representative if any of the above items are missing or damaged.

2

Hardware Installation

This chapter describes the PCI Express Series hardware installation procedure. Since the BIOS automatically assign the PCI Express board's IRQ number and I/O addresses, you must plug in the board before installing the driver.

Step 1 Connect the internal cable to the card

**Note**

Both sides of the cable connectors are the same, it doesn't matter which side you connect

Step 2

Install the card to the Mini PCI-e slot

Make sure you install the card in the right position (fool-proof design)

Step 3

Fix the card on the motherboard (clip type or screw type)

There are 2 options to fix the card. It depends on the design of the motherboard (clip or screw).

1. Clip type: make sure you press down the card and let the clips fix the card
2. Screw type: make sure you tighten up the screws to fix the card

Clip type

Screw type

Step 4 Card installation completed

Connect other side of the cable to the daughter board

Clip type

Screw type

Step 5 Connect the cable to the daughter board

Connect other side of the cable to the daughter board

Note

Both sides of the cable connectors are the same, it doesn't matter which side you connect

Connector Fixation

MECFIX – Versatile Mounting

1. Standard PCI/PCIe Bracket

PCI / PCIe IO Bracket

2. Low Profile PCI/PCIe Bracket

Low Profile IO Bracket

3. Internal Mounting

Upper Fixation – Industrial System

Right & Left Fixation – Industrial System

4. Customized Front / Rear Plate

Front / Rear I/O Plate

Universal Bracket

3

Software Installation

This chapter gives installation, configuration, and update/removal procedures for the driver for Win 2003, Win XP, Win Vista, Win 7, and Win 8.

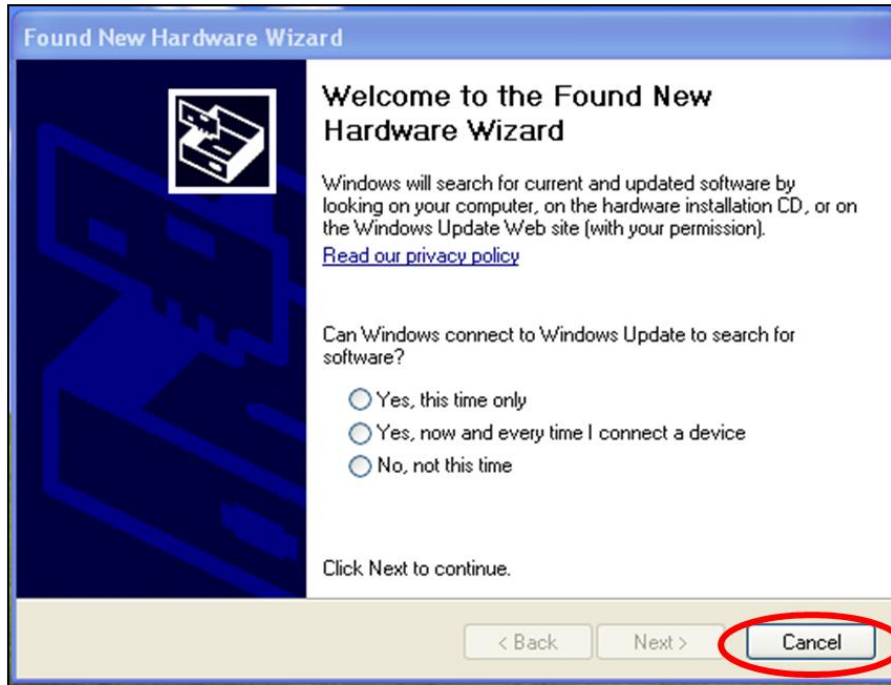

Step 1 Turn on PC and start Windows

Note XP OS as example

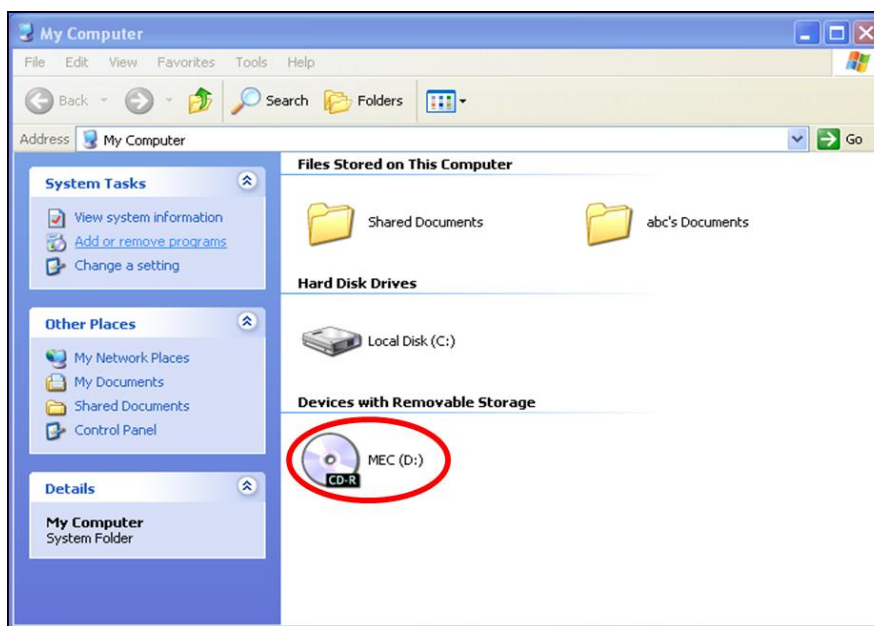

Step 2 Windows automatically detects the new device

1. If the card is installed properly, system would detect the new device and the hardware wizard would start automatically.
2. Click "Cancel" to disregard

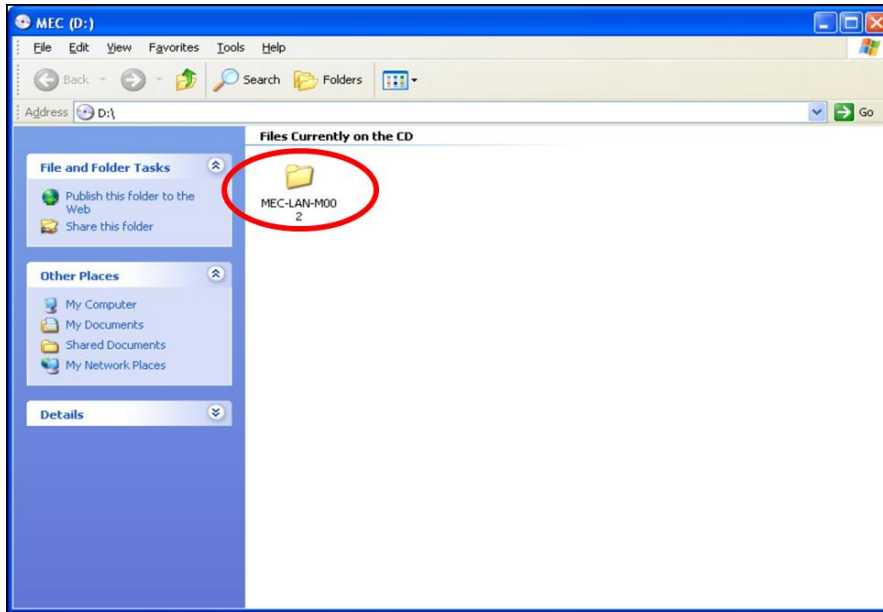

Step 3 Insert CD

Open the CD drive

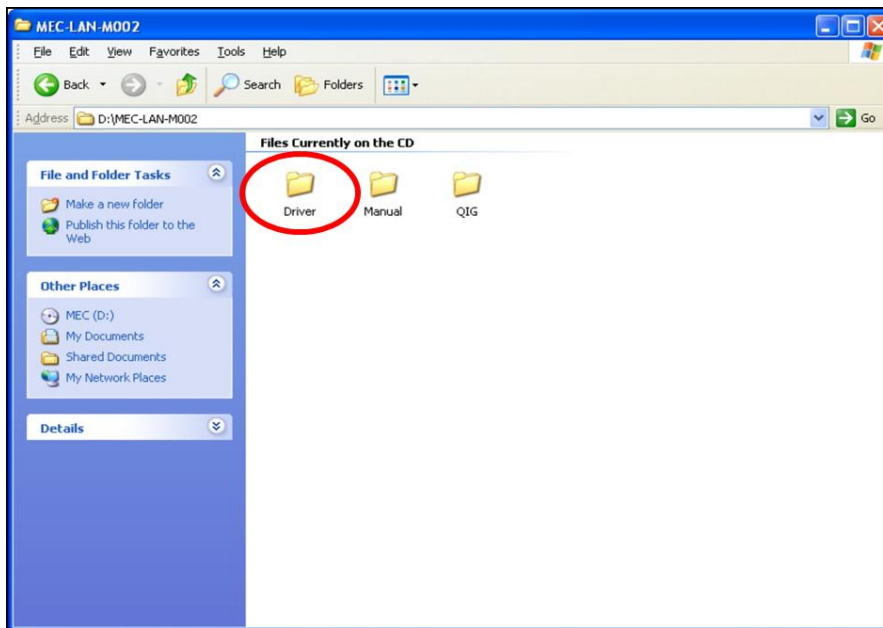

Step 4 Find the “MEC-LAN-M002” folder

Open the “MEC-LAN-M002” file folder

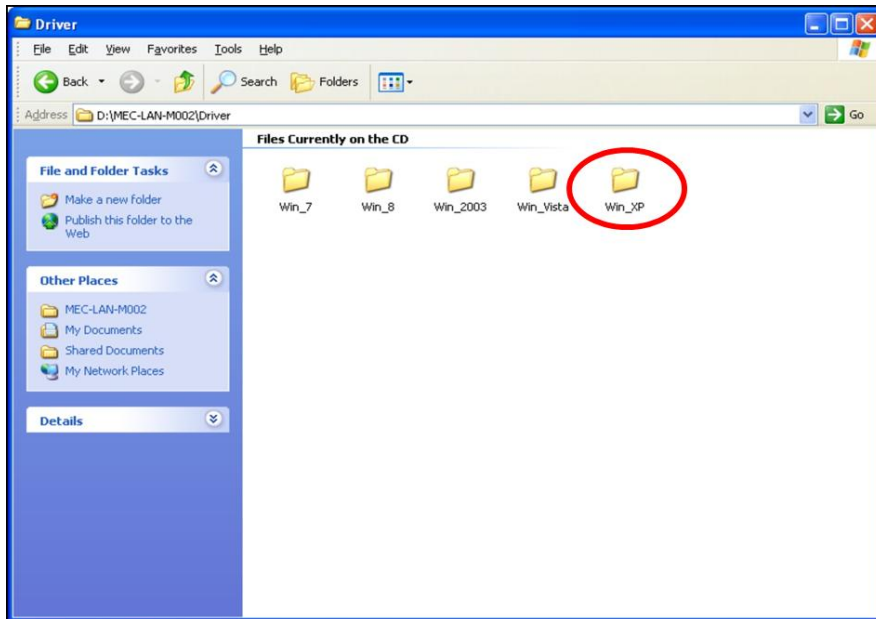

Step 5 Find the “Driver” folder

Open the “Driver” folder

Step 6 Find the appointed OS folder (Ex.: XP)

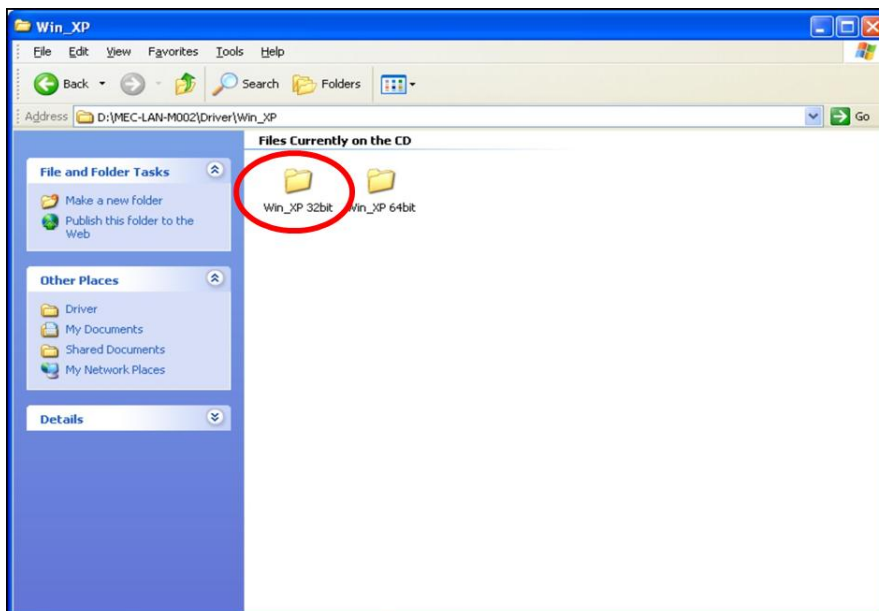

Open the appointed OS folder (We use XP as an example in the above picture)

Make sure you select the correct OS

Step 7 Find your OS version (Ex.: XP 32bit)

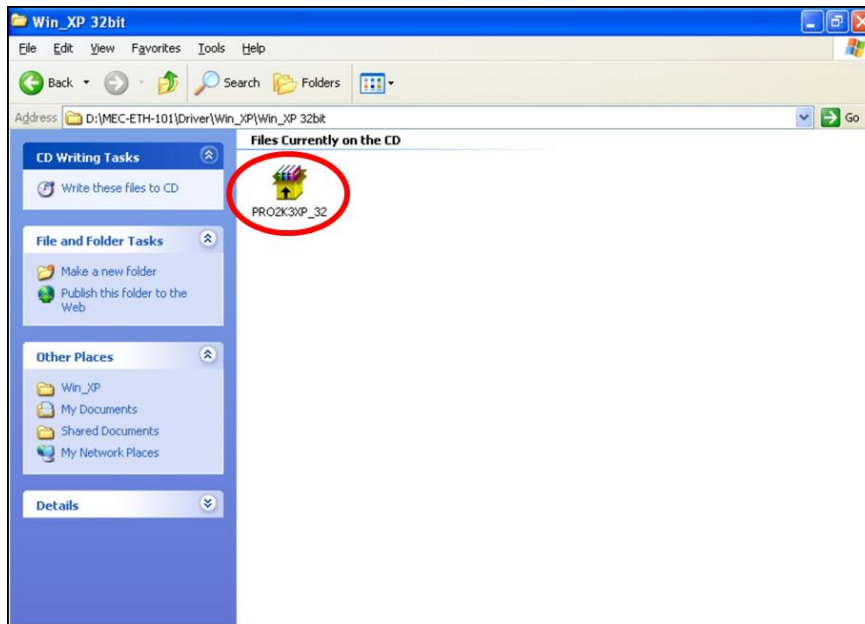

Select appoint OS folder (We use XP 32bit as an example in the above picture)

Make sure you select the correct version of the OS (Ex.: 32-bit or 64-bit)

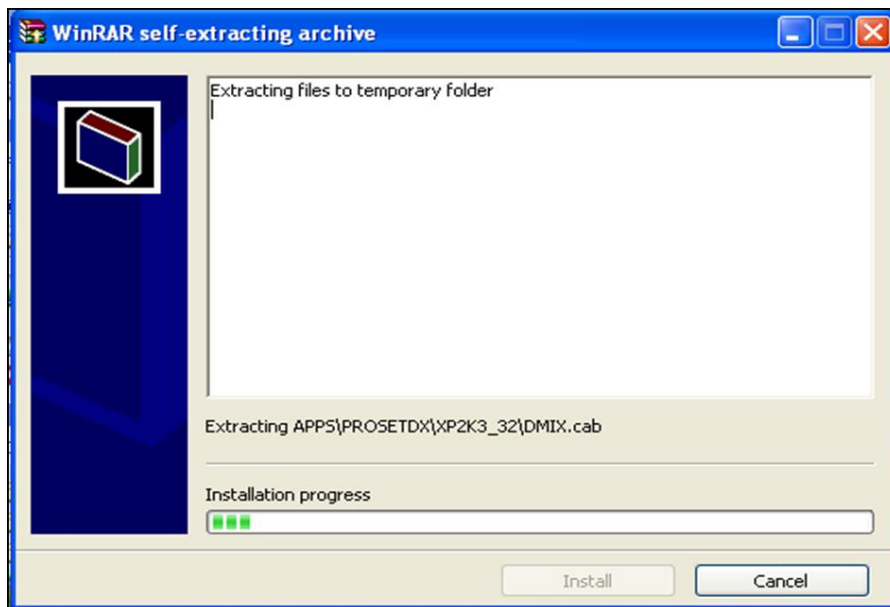

Step 8 Open and Run Driver file

1. Open the driver file
2. Systems starts auto run

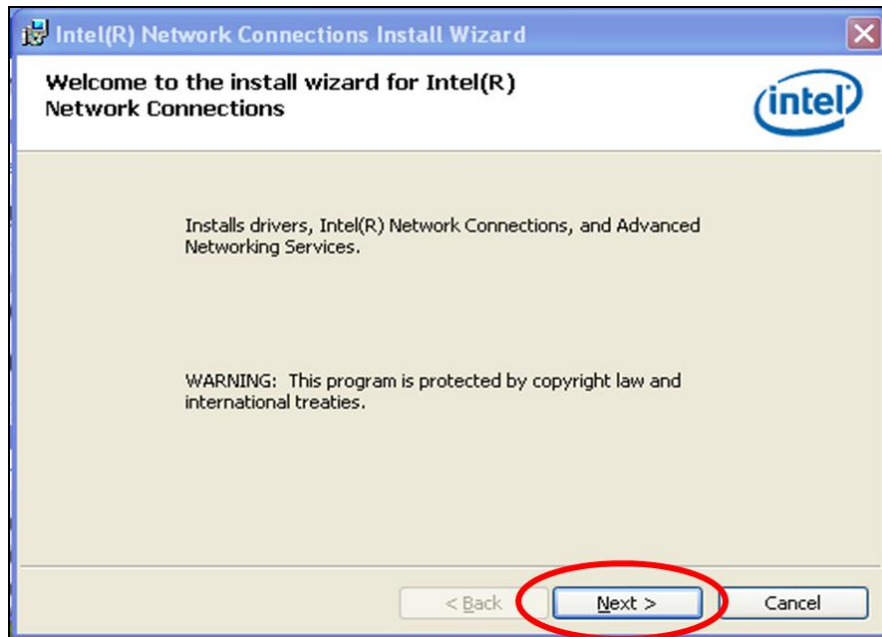

Step 9 System starts auto run

System extracts the file and starts installation automatically

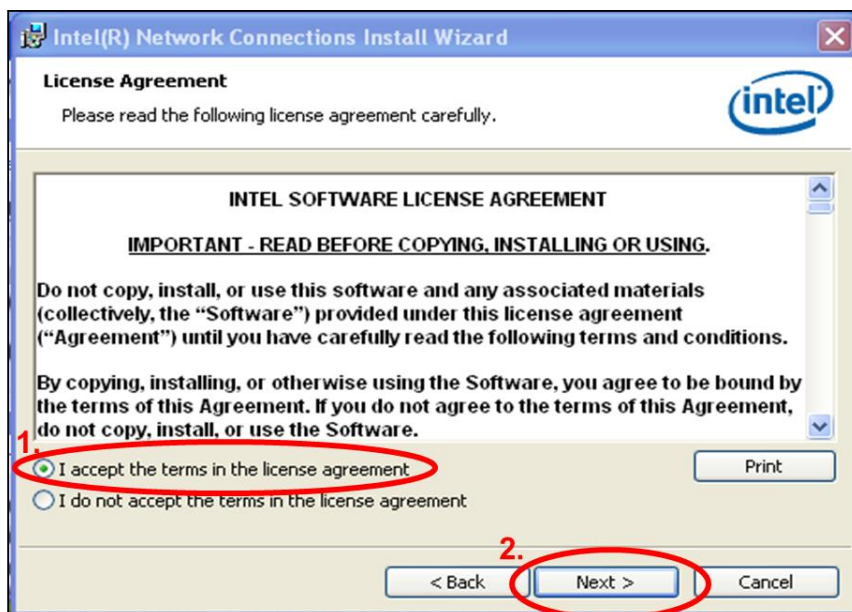

Step 10 Driver installation set up

Click "Next"

Step 11 License Agreement

1. Select "I accept the terms in the license agreement"
2. Click "Next"

Step 12 Driver setup options

1. Select the drivers
2. Click "Next"

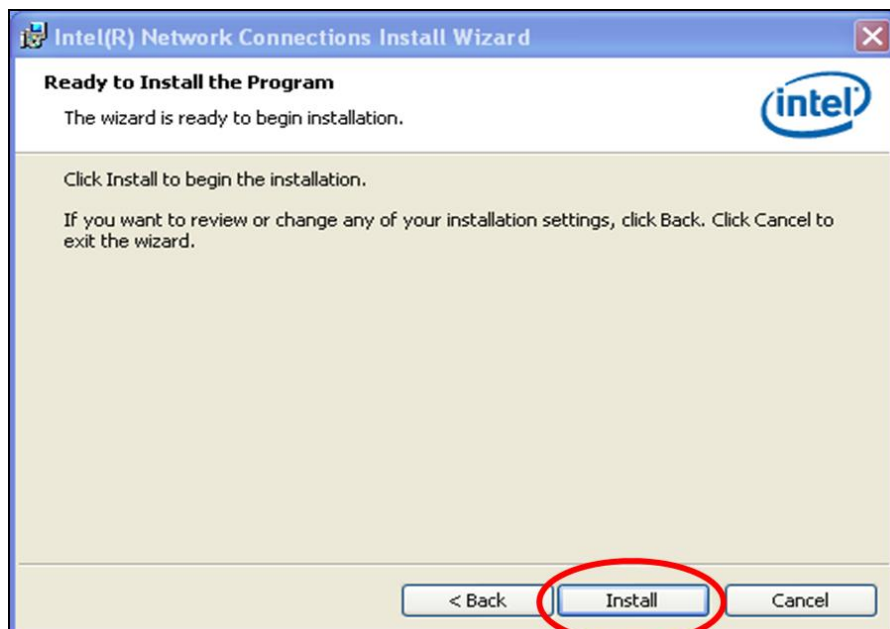

Note

If you are not sure which driver you want to install, keep the default setting and click "Next".

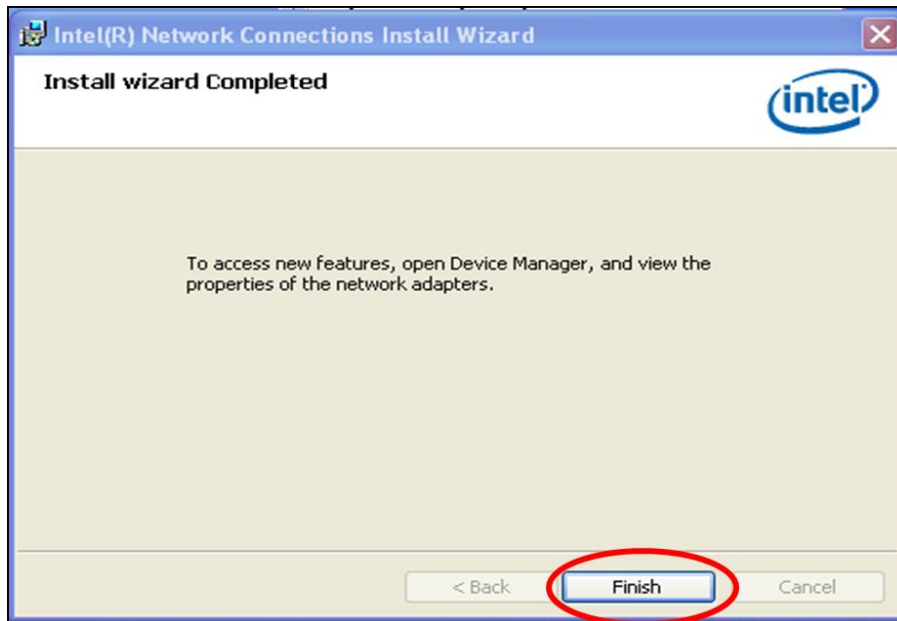

Step 13 Start driver installation

Click "Install"

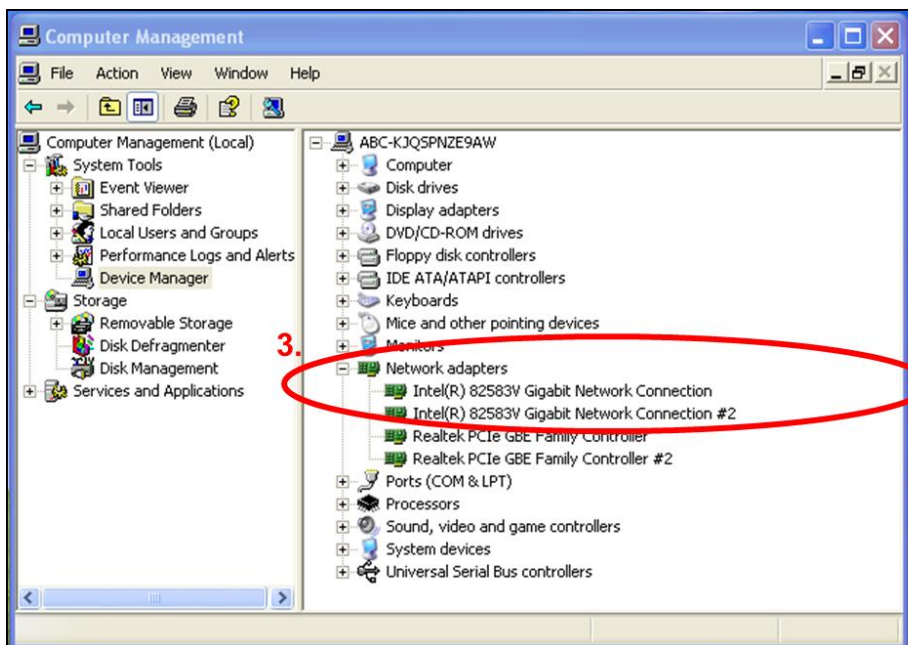

Step 14 Driver installation completed

Driver install is completed, click "Finish"

Step 15 Confirm if driver is installed

1. Start "Computer Management" program
2. Go to the route: *My Computer* → *Manage* → *Device Manager* → *Network adapters*
3. You would find driver name: 2x Intel® 82583V Gigabit Network Connection
4. Device is ready to be used

Appendix

□ **Product Warranty Statement**

Cervoz products are warranted to be free from manufacturing defects in materials and workmanship starting from the date of delivery. The actual warranty period of Cervoz products vary with product categories. Complete details can be found here:

<http://www.cervoz.com/support/warranty.php>

During the warranty period, we shall, at our option, either repair or replace any product that proves to be defective under normal operation.

Defects, malfunctions, or failures of the warranted product caused by damage resulting from natural disasters (such as by lightning, flood, earthquake, etc.), environmental and atmospheric disturbances, other external forces such as power line disturbances, plugging the board in under power, or incorrect cabling, and damage caused by misuse, abuse, and unauthorized alteration or repair, and the product in question is either software, or an expendable item (such as a fuse, battery, etc.), are not warranted.

RMA Instruction

- Customers must fill in Cervoz Return Merchandise Authorization (RMA) Request Form and obtain a RMA number prior to returning a defective product to Cervoz for service.
- Customers must collect all the information about the problems encountered and note anything abnormal and describe the problems on the "Cervoz Service Form" for the RMA number application process.
- Charges may be incurred for certain repairs. Cervoz will charge for repairs to products whose warranty period has expired. Cervoz will also charge for repairs to products if the damage resulted from acts of God, environmental or atmospheric disturbances, or other external forces through misuse, abuse, or unauthorized alteration or repair. If charges will be incurred for a repair, Cervoz lists all charges, and will wait for customer's approval before performing the repair.
- Customers agree to insure the product or assume the risk of loss or damage during transit, to prepay shipping charges, and to use the original shipping container or equivalent.
- Customers can send back faulty products with or without accessories (manuals, cable, etc.) and any components from the card. If the components were suspected as part of the problems, please note clearly. Otherwise, Cervoz is not responsible for the devices/parts.
- Repaired items will be shipped along with a "Repair Report" detailing the findings and actions taken.

Limitation of Liability

Cervoz' liability arising out of the manufacture, sale, or supplying of the product and its use, whether based on warranty, contract, negligence, product liability, or otherwise, shall not exceed the original selling price of the product. The remedies provided herein are the customer's sole and exclusive remedies. In no event shall Cervoz be liable for direct, indirect, special or consequential damages whether based on contract of any other legal theory.
